

The Platinum Pro 350Z

High Performance Fuel and Ignition ECU for Nissan 350Z.

Fully programmable ECU interfacing directly with all the standard Nissan sensors and on board computer systems. Taking control of all the essential engine management tasks such as fuel delivery, ignition timing, boost levels, camshaft positioning and correction maps, the Platinum 350Z ECU even interfaces with the factory Nissan CAN bus for on-board diagnostics and troubleshooting.

Features:

- Sequential Fuel Control
- Direct Fire Ignition Control
- Variable Camshaft position mapping
- Knock Detection
- Engine Rev Limiter
- Closed loop boost control
- Launch control
- Closed loop wideband O2 control
- On board data logging
- Speed density, Alpha-N or MAF tuning
- Additional user definable inputs and outputs
- Windows Software

The Platinum Pro 350Z kit includes:

ECU Programmable Computer, Plug and Play wiring Harness, USB Programming Cable, Instruction Manual (on CD), Programming software
